Dear Friends

We are all really moved by the news and images of the great FIRE in your Country. It is a natural disaster that affects not only Australia but the whole planet. Nature as a whole, human lives, animals, plants, air... every living creature is being damaged.

Because of this we feel very close to your people. Argentinians that have visited your country always remember how nice Australia and its people are.

From here we pray for rain which seems to be the best remedy for this catastrophe. If there is anything we could do from this sport we both share, please let us know because we are willing to help.

With our best wishes, the promise of our prayers and looking forward to helping.
